- The start order of Phase III will be the reverse order of standings after Phases I and II, respectively.

1:00pm Phase IV (Ride Off)

- Prior to the start of Phase IV, a veterinary evaluation will be held for the top ten (10) horses qualified to participate.

- Phase IV is open to the 10 best placed athlete/horse combinations (including those tied for 10th place) according to cumulative scores from Phases I, II, and III.
- The starting order of Phase IV will be the reverse order of standings after Phases I, II, and III.
- Phase IV fences will be set at 1.15m in height with spreads to 1.50m and must include a double or triple combination. The water jump will not be used in Phase IV. Minimum speed of 375 meters per minute with a maximum speed of 500 meters per minute.
- Phase IV will be held over a shortened course and will be judged. The judges will be looking for a rider who can combine speed with short turns, accuracy, an efficient track while maintaining control, classical riding, and the horse's ability to jump clear. The time taken to complete the round will be considered as a factor in the judges' scoring. Faults will be scored as four points deducted from the final score for each rail down. Although Phase IV will be timed, time and faults are NOT the sole deciding factors.
- The judges will score each round numerically and add to each athlete/horse combinations overall score. Scores will not be announced until the end of the class. The Finalist with the highest score from all four phases will be the winner; the Finalist with the second-highest score will finish second, and so on. Finalists that retire or are eliminated will receive a score of zero for Phase IV and placed last in Phase IV. Phase IV will have a multiplier of 2.
